Monitoring and analytics tools

Use tool **Sentry**

The screenshot shows a Visual Studio Code editor window with a project named 'hackathon3'. The Explorer sidebar on the left shows the file structure, including 'src' and 'sentry.config.js'. The main editor area displays the content of 'sentry.config.js', which configures Sentry for a Next.js application. The code includes imports for 'withSentryConfig' and 'SentrywebpackPluginOptions', and sets 'silent' to true. Below the editor, the TERMINAL panel shows the command 'npm install @sentry/nextjs' being executed. The output shows several warnings about the Node.js engine version (v21.6.2) being higher than the versions supported by the installed packages (glob@11.0.1, jackspeak@4.0.2, and next@14.2.13), which require Node.js versions 20 or higher.

```
src > JS sentry.config.js > ...
1  const { withSentryConfig } = require("@sentry/nextjs");
2
3  const moduleExports = {
4    // your existing Next.js config here
5  };
6
7  const SentrywebpackPluginOptions = {
8    silent: true, //Suppresses all logs
9  };
10
11  module.exports = withSentryConfig(moduleExports, SentrywebpackPluginOptions);
12
13
```

```
C:\Users\windows 10\OneDrive\Documents\30 project\HACKATHON03\hackathon3>npm install @sentry/nextjs
npm warn EBADENGINE Unsupported engine {
npm warn EBADENGINE   package: 'glob@11.0.1',
