# Performance optimization

The screenshot shows the Thunder Client interface with a REST API request and response. The request is a GET call to `https://template-03-api.vercel.app/api/products`. The response is a 200 OK status with a 6.56 KB size and a 228 ms time. The response body is a JSON array containing product information for the Nike Air Force 1 Mid '07.

```
1 {
2   "success": true,
3   "data": [
4     {
5       "productName": "Nike Air Force 1 Mid '07",
6       "category": "Men's Shoes",
7       "price": 10795,
8       "inventory": 20,

14       "description": "The Nike Air Force 1 Mid '07 delivers timeless style with premium leather and mid-cut design. Perfect for everyday wear, it provides exceptional comfort and durability. The iconic Air-Sole cushioning adds responsive support for long-lasting performance."
15     },
16     ...
17   ]
18 }
```

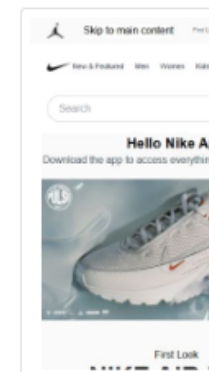

Test Case ID	Test Case Description	Test Steps	Expected Result	Actual Result	
2	TC001	Validate product listing page	Open product page > Verify products	Products displayed correctly	P
3	TC002	Test API error handling	Disconnect API > Refresh page	Show fallback UI with error message	E
4	TC003	Check cart functionality	Add product to cart > Verify cart contents	Cart updates with added product	C
5	TC004	Ensure responsiveness on mobile	Resize browser window > Check layout	Layout adjusts properly to screen size	R

# Lighthouse testing

## Performance

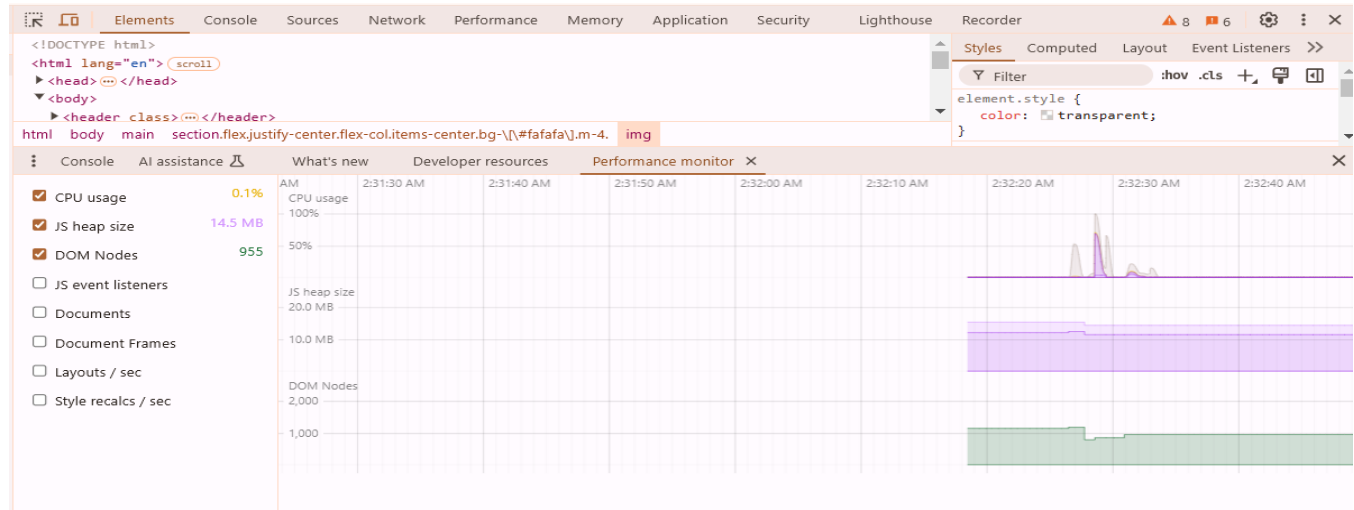

Values are estimated and may vary. The [performance score is calculated](#) directly from these metrics. [See calculator.](#)

# Developer resources

The screenshot shows the Chrome DevTools interface. The left pane displays a portion of a Nike website, including a search bar and a "Hello Nike App" section with a sneaker image. The right pane shows the "Elements" panel with the HTML structure of the page. The "Developer resources" tab is active, displaying a table of resources loaded by the browser.
